Fast, Safe and Reliable Service at a Competitive Price

ABOUT MEGASAW CONCRETE CUTTING & DRILLING SPECIALISTS!

Leading the industry with over 40 years experience, Megasaw specialises in Concrete Cutting, Sawing and Drilling for both commercial and domestic projects throughout Victoria.

We have over 10 fully equipped vans with all modern technology equipment to ensure a fast service at a competitive price.

We realize that happy clients are the key to a successful future and therefore we do not leave a project until our clients are 100% satisfied.

CORE DRILLING

When precise circular cuts are required in walls or floors – up to 1mtr dia / 1mtr deep

ROADSAWING

Suitable to cut horizontal flat surfaces such as floors, bridge decks, bitumen and pavement. Road/Floor saws are typically used to provide expansion joints, remove concrete sections for demolition and remove damaged pavement sections

HANSAWING

Suitable for cutting walls and floors at a depth of up to 150mm. We have a range of electric and petrol saws to undertake specific work.

RINGSAWING

Similar to a handsaw except the ringsaw can cut to a depth up to 275mm deep (300mm with a 300 Ringsaw)

WALLSAWING

From cutting windows or door openings, when cutting through heavily reinforced concrete at depths of up to 750mm

WIRESAWING

Preferred method for cutting virtually any size of heavily reinforced concrete

EARLY ENTRY SAWING

Cutting method to prevent random cracking into freshly poured slabs
